AT&T Device Unlock Code Instructions

Descargar las instrucciones en español para desbloquear equipos de AT&T (PDF de 588 KB)

To unlock your AT&T phone or tablet so it will work on another carrier's network, you will need to request an unlock code from AT&T. Once you receive this code, you will need to follow the unlock instructions provided here for your device.

Before you start:

- **Request unlock code** - To request an unlock code simply visit us at att.com/deviceunlock to review the requirements and submit an AT&T Mobile Device Unlock request. Requests will take up to five business days to complete. If you have already requested an unlock code online, check your status at att.com/deviceunlockstatus.
- **AT&T branded devices only** - Ensure your device is an AT&T branded device before proceeding. AT&T only unlocks AT&T branded devices. The AT&T logo should appear somewhere on the device (above the display, on the back, or under the battery).
- **Follow instructions carefully** - Use extreme care during the unlock process, as the incorrect entry of an unlock code too many times during the life of the device permanently disables the unlock ability. The number of attempts to unlock the device is dependent on the manufacturer and model.

To view instructions to unlock your device, select the link below for your device manufacturer.

Acer	LG
Alcatel	Microsoft
Amazon	Motorola
Apple	Nokia
Asus	Palm
Audiovox	Pantech
Blackberry	PCD
Dell	Samsung
Garmin	Sharp
HP	Siemens
HTC	Sonim
Huawei	Sony & Sony Ericsson
Kyocera	TCT Mobile
Lenovo	ZTE

Acer

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Iconia Tab A501-10S16u

1. Shut down the tablet
2. Insert non-AT&T SIM and power on the tablet.
3. Enter the unlock code. The device is now unlocked.

Alcatel

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

510A, OT871A, 4015T

1. Insert a non-AT&T SIM card.
2. Enter the unlock code and select **OK**. The device is now unlocked.

Amazon

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Insert a non-AT&T SIM card into the phone.
2. Press and hold the **Power** button. After the phone turns on, enter the **SIM network unlock PIN** when prompted.
   - Tap the blank PIN field and the onscreen keyboard will appear.
   - Enter the unlock code, and then tap **Unlock**.
3. You will see the message, "SIM Network unlocked," on Fire phone.
4. You will then be taken to the **Home** screen. The device is successfully unlocked.

Apple

Once you have received the email confirming AT&T has approved and processed your unlock request, follow these instructions to complete the unlock for your device.

Using a Non-AT&T SIM Card

1. Remove your SIM card and insert the new SIM card.
2. Complete the setup process.

Using an AT&T SIM Card

1. Back up your iPhone.
2. When you have a backup, erase your iPhone.
3. Restore your iPhone from the backup you just made.

Asus

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device:

Asus TF300TL, TF600TL (Vivo Tab Rt Tablets), ME375CL, ME302KL, K009, T00S, Z00D, T00D

1. Power off the device and remove the AT&T SIM card.
2. Insert card from another wireless carrier.
3. Power on the device.
4. The device will prompt for the unlock code.
5. Enter the unlock code.

Asus ME370TG

1. Power off the device and remove the AT&T SIM card.
2. Insert card from another wireless carrier.
3. Power on the device.
4. Tap **AT&T AllAccess** tile in the start screen. The application displays the screen for you to enter the code.
5. Enter the unlock code and select **unlock device**.

Audiovox

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device:

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device. The display shows no wording.
4. Enter the SIM unlock code.
5. Select **OK**. The device is unlocked.

Blackberry

Once you have received the email confirming AT&T has approved your unlock request, follow the instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

Blackberry 5800, 6210, 6280, 6710, Curve 9300, Curve 9360, Pearl 9100

Device Unlock Steps Using a Non-AT&T SIM

1. Insert a non-AT&T SIM card.
2. Power the device on and turn off the radio (turn Wireless option **Off**).
3. The device displays "Your current SIM card requires an Unlock Code. Would you like to unlock your device?" Select **Yes**.
4. Enter the unlock code and select **OK**.

Device Unlock Steps Using an AT&T SIM

1. Insert an AT&T SIM card.
2. Power phone on and turn off the radio (turn Wireless option **Off**).
3. Select **Settings > Select Options > Advanced Options**.
4. Scroll down and select **SIM Card**.
5. Hold down the **ALT** key and type **MEPD** (not displayed on the screen).
6. Hold down the **ALT** key and type **MEP2** (not displayed on the screen).
7. Enter the unlock code and press **Enter**.
8. Power the device off and on.

Blackberry 93xx Series Versions 6.0 and 7.0

1. Insert an AT&T SIM card.
2. Power phone on and turn off the radio (turn Wireless option **Off**).
3. Select **Options > Device > Advanced Systems > Settings**.
4. Scroll down and select **SIM Card**.
5. Type **MEP** and hold down the **ALT** and **2** keys.
6. A prompt appears to enter the **MEP2** code; enter the unlock code.
7. Press **Enter**. Verify that the acceptance message is received.
8. Power the device off and on.

Blackberry 7000 series (all), 7100g, 7130c, 7210, 7230, 7280, 7290, 7780

1. Go to **Options**.
2. Scroll to SIM CARD, then press **jog dial** once to select it.
3. Type **MEPD** (not case sensitive and will not appear on the screen).
4. Does it say "Network Active?" If so, the device is locked.
5. Press and hold the **alt key** (key on the lower-left side).
6. While holding the **alt key**, type in **MEPE** (not case sensitive and will not appear on the screen).
7. Enter the unlock code when prompted then press **jog dial** once.
8. The device is now unlocked.

Blackberry 8100c, 8110, 8220, Pearl 8120, 8700c, 8800, 8800c, 8820, All Blackberry devices running software version 4.5

5. Hold down the left shift (**CAP**) key and type **MEPD**. This does not display on the screen.
6. Hold down the **ALT** key and type **MEP2**. "MEPE" displays on the screen.
7. Enter the unlock code and press **Enter**.
8. Reboot the device.

Blackberry Q10, Passport

1. Power **On** the device with a non-AT&T SIM card.
2. Let the device fully load.
3. Go to **Settings**.
4. Select **Security and Privacy**.
5. Select **SIM Card**.
6. Select **Unlock Network**.
7. Enter the unlock code and press **OK**.
8. The device displays "Network unlock successful."

Blackberry Z10, Classic SQC100

1. Power on the device with a non-AT&T SIM card.
2. Let the device fully load.

3. The device displays "SIM Network Locked."
4. Press **Lock** to begin.
5. The device displays "Network Locked."
6. Press **Enter Code**.
7. Enter the unlock code and press **OK**.
8. The device displays "Network unlock successful."

Blackberry Playbook

1. Insert a non-AT&T SIM card into the tablet.
2. Go to **Settings**.
3. Select **Security** > **SIM Card**.
4. Select **Enable Security**.
5. Enter the unlock code when prompted.
6. Press **OK**.

Blackberry PRIV

1. Power off the device and remove the AT&T SIM card.
2. Insert a non-AT&T SIM card into the device.
3. Power on the device. The device will prompt for the unlock code.
4. Enter the unlock code.

5. Dell

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions for your model number to complete the unlock for your device.

Ten unsuccessful unlock attempts permanently locks the device to the AT&T network.

Dell Streak M01M, Streak 7 M02M, Aero 3G GR

1. Power off device and remove the AT&T SIM card.
2. Insert a non-AT&T SIM card into the device.
3. Power on the device.
4. Select **Enter Code**.
5. Enter the unlock code.
6. Select **Done**.
7. The device is successfully unlocked.

Dell Venue

1. Power on device with a non-AT&T SIM card.
2. Let fully load.
3. Phone displays "SIM Network Locked."
4. Pull lock to begin.
5. Phone displays **Network Locked**.
6. Press **Enter Code**.
7. Enter the unlock code and press **OK**.
8. "Network unlock successful" displays.

Dell Venue Pro

1. Power on Dell mobile phone with a non-AT&T SIM card.
2. Enter Dell unlock code.
3. Dell mobile phone should now be unlocked and may automatically reboot.

Garmin

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device:

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Power off the device and remove AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device.
4. Allow the device to fully power up. The message, "Insert a valid ATT SIM Card or unlock the Device using correct NCK code" appears.
5. Press **OK**.
6. Enter the unlock code.
7. Press **OK**. The device is unlocked.

HP (Hewlett-Packard)

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Ten unsuccessful unlock attempts permanently locks the device to the AT&T network.

HP iPAQ 510, iPAQ 910, iPAQ 6510, iPAQ 6515, iPAQ-J6925, iPAQ-J6920

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device. Wait approximately 30 seconds until the **SIM Lock** application appears.
   - The unlock application enables the input box after a certain period of delay.
   - The delay period for the first attempt is 30 seconds but doubles after each incorrect attempt to unlock the device.
   - This deters users from attempting a trial and error approach to unlocking the device.
   - The delay may be longer if the user has already attempted to unlock the device with the wrong code.
4. Enter the unlock code in the blank field.
5. Press **OK**.
   - If the unlock code is incorrect, an error dialog appears. After pressing **OK**, re-enter the unlock code after a delay period (see the delay information above in Device-Specific Information).
   - If the unlock code is correct, a success dialog appears.
6. Press **OK**. The device is now unlocked and continues booting.

HP P160UNA, HSTNH-I30C, HSTNH-F30CN, HSTNH-B16C, Slate 7 Plus (MU739), Elite Pad 900

1. Power off the device.
2. Insert a SIM card from another wireless carrier.
3. Power on the device.
4. Enter the unlock code when prompted.

HTC

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

All HTC devices

1. Power off the device and remove the AT&T SIM card.
2. Insert a non-AT&T SIM card.
3. Power on the device. Wait a few moments, allowing the device to fully power-up.
4. Enter the unlock code when prompted.
5. Press **OK**. The device is unlocked.

Huawei

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Huawei Fusion, Fusion 2, U2800A, U8800, Media Pad S7-312u, Y536A1

1. Power off the device and remove the AT&T SIM card.
2. Insert card from another wireless carrier.
3. Power on the device.
4. The device will prompt for the unlock code.
5. Enter the unlock code.

Kyocera

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

1. Power off device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device.
4. Enter the unlock code when prompted.
5. Press **Unlock**.
6. The device displays "SIM Network unlock successful." The device is successfully unlocked.

Lenovo

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Lenovo ThinkTab Tablet, ThinkPad Tablet 2 EM7700, ThinkPad 10, IdeaTab A2107A, Helix

1. Power off the device and remove the AT&T SIM card.
2. Insert SIM card from another wireless carrier.
3. Power on the device.
4. Launch the **People App**, and enter **####1001#** in the search edit box. This will take you to the **SIM Lock/Unlock Screen**. Select **Unlock**.
5. Enter the unlock code. The device will reboot.

LG

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

LG G2 (D800), G3 (D850), G3 Vigor (D725), G Vista (D631), G Pad 7.0 LTE, Optimus G (E970), E980 Optimus G Pro, CT815 Incite, C410 Xpression 2, A380, D950 Flex G, H950 G Flex2, V495 LG G Pad F 8.0, H443 Escape 2, H810 LG G4, H740 Vista 2, V930 G Pad X 10.1, H900 LG V10, H820 LG G5

1. Power off the device and insert a non-AT&T SIM card.
2. Power on the device.
3. Enter the unlock code provided.
4. Select **Unlock**.
5. The device is unlocked.

LG GU255, GU292

1. Power off the device and insert a non-AT&T SIM card.
2. Power on the device.
3. On the idle screen, enter ***#865625#.**
4. Select **Unlock SIM**.
5. Select **Network Lock**.
6. "SIM Unlock Process. You are about to SIM unlock your phone. Continue?" displays. Select **Yes**.
7. Enter the 16-digit unlock code and select **OK**.
8. Re-enter the same unlock code.
9. Select **OK**. The device is unlocked.

LG CE500

1. Power off the device and insert an AT&T SIM card.
2. Power on the device.

3. On the idle screen, enter **2945#*7101#.**
4. Select **Settings**.
5. Select **Security > SIM Locks > Network > Deactivate**.
6. Enter the eight-digit unlock code in the Enter NCK Input screen.
7. Select **OK**. The device is unlocked.

LG CU400, CU405

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device. Device displays "Invalid SmartChip."
4. On the idle screen, enter **159753#*#.**
   - This code does not display on the screen.
   - Push 1 for network unblock before entering the unlock code.
5. Enter eight-digit unlock code.
6. Select **OK**. The device is unlocked.

LG CU500, CU500v

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the device. "Invalid SmartChip" displays.
4. On the idle screen, enter **159753#*#.** The device displays Enter. NCK Remaining: 5.
5. Enter the unlock code.
6. Select **OK**. The device is unlocked.

LG Trax CU575

1. Power off the device and insert a non-AT&T SIM.
2. Power on the device. "Invalid SIM status" displays. Enter ***#865625#.**
3. "Unlock USIM" displays.
4. Select **1. UNLOCK USIM**.
5. Select **Network Lock**. Enter **NCK**. "Remaining: 5." displays.
6. Enter the 16-digit unlock code then select **OK**. This code does not display on the screen.
7. "Network Unlock Success" displays. The device is unlocked.

LG A340, CU515, Shine CU720, Shine II GD710, Vu (No Mobile TV) CU915, Vu (Mobile TV) CU920, Xpression C395

1. Power off the device and insert a non-AT&T SIM card.
2. Power on the device.
3. On the idle screen, enter ***#865625#.**
4. Select **Unlock SIM**.
5. Select **Network Lock**.
6. Enter the 16-digit unlock code and select **OK**.
7. Re-enter the same unlock code.
8. Select **OK**. The device is unlocked.
9. Power off the device and place the original SIM Card back into the device.

LG A7110, Adrenaline AD600, C1300, C1300i, C1500, C2000, CE110, CG180, CG300, CP150, CU320, F7200, F9100, F9200, G4010, G4050, GR700 Vu Plus, GU285, GU295, L1200, L1400, LUU 2100TI, Prime GS390, Phoenix P505, Quantum C900, 1400i, L21G, L33L

1. Power off the device and remove the AT&T SIM card.
2. Insert a non-AT&T SIM card and then power on the device.
3. Select **UNLOCK** on the touch-screen.
4. Select **OK**.
5. Enter the unlock code.
6. Select **OK**.
7. Re-enter the same unlock code.
8. Select **OK**. The device is unlocked.

LG eXpo GW820, Incite CT810

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from other wireless carrier.
3. Power on the device. "The device is locked by a network" or "Invalid SIM message" displays:

Motorola

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Power off the device and remove the AT&T SIM card.
2. Insert a SIM card from another wireless carrier.
3. Power on the handset. Allow the phone to fully power up.
4. Enter the unlock code when prompted.
5. Press **OK**.
6. When complete, the device is successfully unlocked.

Nokia

Once you have received the email confirming AT&T has approved your unlock request, follow these instructions to complete the unlock for your device.

Nokia E61, E62

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Power off the device and remove AT&T SIM card.
2. Insert a SIM card from another wireless carrier into the phone.
3. Power on the handset. "Undo request" displays.
4. Press the **#** key.
5. Press the **P** key.
6. Press the **W** key.
7. Press the **+** key.
8. Enter the unlock code.
9. Press the **+** key.
10. Press the **1** key.
11. Press the **#** key. The handset is successfully unlocked.

Nokia C3, E71x

Three unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Remove the SIM card, then power on the handset.
   Note: A SIM card is not necessary to perform the unlock procedure; however, if the unlock steps fail without a SIM card, try inserting a SIM into the device.
2. Press the **#** key.
3. Press the **P** key.
4. Press the **W** key.
5. Press the **+** key.
6. Enter the unlock code.
7. Press the **+** key.
8. Press the **1** key.
9. Press the **#** key. The handset is successfully unlocked.

Nokia Lumia 2520

Ten unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Switch the device off.
2. Remove the AT&T SIM card.
3. Insert a non-AT&T SIM card.
4. Switch the device on.
5. Go to the Windows 8.1 Start screen and launch **AT&TAllAccess**.
6. Enter the unlock code (8 digits) and tap **Unlock device**. The device is now unlocked.

All other Nokia Lumia models

Ten unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Switch the device off.
2. Remove the AT&T SIM card.
3. Insert a non-AT&T SIM card.
4. Switch the device on. If prompted, enter the **SIM PIN** code.
5. Wait for the **SIM unlock** window to open.
6. Enter the unlock code provided (8 or 20 digits) and press **Enter**.
7. Power the device off.
8. Power the device on. The device is unlocked.

All other Nokia devices (excluding Lumia models)

Five unsuccessful unlock attempts permanently locks the device to the AT&T network.

1. Power on the handset.
2. Press the **#** key.
3. Press the ***** key three times (displays a P).
4. Press the ***** key four times (displays a W).
5. Press the ***** key two times (displays a + sign).
6. Enter the unlock code.
7. Press the ***** key two times (displays a + sign).

6. Enter the 16-digit unlock code.
7. Select **OK** (left soft key).
8. Select **OK** to reset the device.

AT&T locks handsets in order to recover costs and to control theft of devices. Even at full retail, a device purchased from AT&T is often priced less than a comparable device purchased at full retail from another retail location. Therefore, AT&T limits the quantity of requests so that we can discourage possible speculation by individuals and companies who may take advantage of this price difference for their own profit.

Request Restrictions

- AT&T reserves the right to decline the release of unlock codes if we suspect that the request is not legitimate or if we suspect abuse.
- Any customer porting to AT&T from another carrier or leaving AT&T requires the unlock code before their device accepts the new carrier's SIM card.
- AT&T devices are SIM-locked to all AT&T networks and do not need to be unlocked if a customer relocates or changes their home network.
- AT&T does not generate the device unlock code for handsets of other carriers.
- Customers that have activated AT&T service with a non-wireless handset should be referred to their previous carrier to request an unlock code.

Device Unlocking History

- AT&T locks all devices, as of November 11, 2004.
- From 2001 to October 31, 2004, only domestic devices were locked (850MHz and 1900MHz radio frequencies). International tri/quad-band devices were unlocked. Tri/quad-band devices were those with 900MHz and 1800MHz radio frequencies.
- Prior to 2001, all devices were locked.

Device unlock codes are unique to each device and are tied to the International Mobile Equipment Identity (IMEI) number. The code is a unique 8-16 digit unlocking code for each device as determined by the manufacturer.
