The below procedure can also be used to restore the STOCK GB . Don't just get confused by title . Its a complete restore to stock .

As Almost everyone must be suffering from the band change bug and want to Go back to gingerbread and than come to ICS with there desired band .. Or if there's Other reason also than too This guide will help you out .

1. Install Pantech PC suite And Make sure your device is recognizable by PC.
2. Enable USB debugging on your device by going to Settings->Developers Option -> Usb Debugging(tick this).
3. Download This File --> [Click ME](#) [Uploaded on Safe server by Gizmolord . Please Don't mirror without permission]
4. Install this ' P9070_Download_Tool_v3.3.exe ' found in the above link .

5. Make your phone in S/W Upgrade mode by shutting down first than pressing volume up-down together with power button till you see the S/W upgrade mode on screen .
6. Open the Tool ,

7. Click on open file And select The PANTECH_PRESTO_BIN_JUUS03122012.PDL File .
8. Click on Download .

In 5-6 Minutes you'll Have the Stock GB right in your phone .

It is 😄 I just tested . When you will extract the p9070.zip You'll see "P9070_Download_Tool_v3.3.zip" and "PANTECH_PRESTO_BIN_JUUS03122012.pdl" And an "_MACOSX" folder . Extract the download tool folder and use the tut above . There must be something with your pc . Software is working fine like a charm .

you need to have your phone conntected in S/W update mode , also your phone should be recognizable to pc . Drivers is your issue . I wrote a post to fix drivers also .see the sticky topic .

Exactly what I needed. ICS upgrade on AT&T locked me out being able to set GSM as preferred network.

you can switch network on ICS too by this method 😊

<http://forum.gizmolord.com/android-modding/pantech-burst-quick-guides/>

^check for relevent thread there.

If you're going to remove the file, close the thread. I searched and searched for the file P9070_Download_Tool_v3.3.exe and cannot find it anywhere.

yup its not there :/. The actual drop box user removed it . Wait I'll upload on my own google drive . So that I shouldn't be dependent on anyone . Thanks for the info 😊

The file downloaded but once I loaded the installer and had it load the pdl file, the download button on the program is not available. I had my phone in s/w upgrade mode, any suggestions?

might be driver issue as-well . But file becomes loaded when its loaded in the soft ! . You please make sure the device is fully recognizable in ADB !!

Ok, 3 questions: 1. Will this work on a rooted ics pantech burst? 2. Will this erase all my data? 3. Is there a chance this might brick my phone? Because on my last phone, I tried downgrading it but it only resulted in hard bricking it. Sorry if im asking these questions, im still learning

Sorry if im asking these questions, im still learning

1 . It will work in any condition , doesn't matter rooted or not 😊 .

2. Yups it will erase data like apps , cache and all . No camera photos like that .

3.Yup theres chance of brick if you interpret the download b/w the process . Rest everything will be extremely fine 😁

For rooting guide and all look here 😄 <http://forum.gizmolord.com/android-modding/pantech-burst-quick-guides/> Also ADB stands for android debug bridge 😄.

I have a problem. Did this on my Pantech after having put the Gizmolord ROM. And now I can't connect to my network. It says "Phone is SIM locked". Can someone help me?
